UK & NI

Nachhaltigkeit

It is our intention to develop a bee pollinator programme. Ultimately, I have a dream that everywhere that sells a Beekon will do at least one thing that supports a bee pollinator programme. We actively deploy wildflower seeds as part of our activation. This month we kick off our partnership with Airfield Estate to undertake Bee and Growing experiences with bar managers and staff to heighten the awareness and impact of our behaviour in a bid to effect change in some way. Further pollinator initiatives will be coming down the line.
