Manufacturing

Bio-marine Ingredients Ireland (BII) is a marine bio-tech company located in Ireland producing all natural marine ingredients.

BII is a joint venture between Irish fishing vessel owners and Norwegian partners who are experts in marine ingredients. BII produces the highest quality marine ingredients utilizing the vast quantities of blue whiting which are located proximate to the Irish coast.

The main shareholders in BII are fishermen who are the key holders of these quotas which constitute the bulk of the raw materials being supplied to the BII facility. The combination of an integrated supply chain and state-of-the-art production facilities means BII is a leader in the supply of marine-based ingredients to the international marketplace.

Why Us

100% Sustainable Clean Novel Ingredient Source

Our product range

Soluble Protein Hydrolosate Power 90, 80
Partly Soluble Protein Hydrolosate Powder 65, 80
Insoluble Protein Hydrolosate 35
Calcium Powder
Fish Oil
