Cashel Farmhouse Cheesemakers is a 100% family-owned business focused primarily on the making of branded blue cheese. Its cows' milk cheese is branded Cashel Blue, while its sheep's milk cheese is called Crozier Blue.

Established in 1984 by Louis and Jane Grubb, the company is now managed by a second family generation, with the original cheese recipe created by Jane.

Cashel Blue is a registered international brand. Cheese quality, flavour excellence, and production sustainability are its primary company objectives. All Cashel and Crozier Blue cheese is made, matured, graded and selected at Beechmount Farm, Co. Tipperary, close to the historic town of Cashel.

Why Us

Cashel Farmhouse Cheesemakers is the best known producer in its field. Over 50% of the company's cheese is exported into the international speciality cheese market. Its cheese quality is consistently recognized both in national and international food competitions.

The Cashel; Blue Hero brand is a recipe unique to one Irish family made for over 30 years on a family farm in rural Ireland. The company offers a rare combination of authenticity, professionalism and production capability.

Nachhaltigkeit

- Sustainability is very important to Cashel Farmhouse Cheesemakers and the company are actively working towards a zero carbon production process.
- In 2022 additional solar panels will be added to supplement the current 45kWp system. These will provide at least 50% of all electricity used on site and reduce carbon emissions by at least 50 tonnes/year
- As part of the company's packaging target, Cashel Farmhouse Cheesemakers have achieved an on-pack plastic reduction by 10%

- Over the course of the company's current sustainability plan (2020-2024), there is a target in place to reduce absolute water usage per kg of product manufactured by 5% over 5 years.
