Retail

Founded in 1979 by Seamus Carroll, Carroll Cuisine started as a cooked ham manufacturer and distributor. The business was acquired by IAWS in 2004.

Three years later in 2007, Carrolls was awarded its Bord Bia certification. Come 2009, the company expanded into the manufacturing of pre-packed sliced meats.

By 2015, a management-led buyout instigated significant growth, and Carrolls began manufacturing poultry and beef. Later that year, it was awarded the fastest-growing brand in Ireland and also maintained its spot as the number one selling ham brand.

Why Us

Carroll Cuisine produce succulent and flavoursome cooked meats for the Irish consumer, alongside chilled ready meals and other products. Producing high quality cooked meats the consumer can trust is at the core of the Carroll's business. The succulence of a Carroll's product is the key differentiator between ourselves and our competitors. We have found, through research, that the consumer prefers a succulent product that delivers on flavour every time, from our hams to our poultry. The depth of the flavours delivered by Carroll's is second to none, and a reason our consumer keep coming back.
