Over 325 years ago, in 1690, Coffee House Lane, adjacent to the then busy trading part of Waterford, boasted what is long believed to be Ireland's first ever coffee house.

COFFEE HOUSE LANE
of Waterford

Hand Roasted and Blended in
Waterford, Ireland using only
the Finest Arabica Coffee Beans

Medium Dark Roast, for a Smooth,
yet Intense Coffee Experience.

AIKENHEADS
FRESHGROUND

STRENGTH
4 out of 5

Green Coffee was traded at the Port, then Roasted, brewed and sold at John Aikenheads Coffee House on what became, Coffee House Lane of Waterford. Originally roasting since 2011 as a small artisan roaster, its move to a new state of the art coffee roasting facility in 2016 has seen its investment in Roasting equipment and staff grow, giving them an output capacity of over 2 metric tonnes of coffee per day when required.

Coffeehouse Lane is named after the street in Waterford which was the site of Irelands very first coffee house and Irelands first commercial cup of coffee was served there in '1690'.

Why Us

Our unique blends are a proven consumer favourite on the Irish market. As a 'small' family business we are also robust and adaptable, capable of roasting private label/own brand, or multiple brands.

Our product range

Coffee wholebean and freshground for retail and foodservice

Markets

Australia

Europe

Middle East

North America

UK & NI

- Coffee House Lane set targets around a number of different areas of the business including supplier certification, packaging, energy, water, waste, health and nutrition, and community engagement, being fully committed to achieving and surpassing targets set.
- The company demonstrated an exemplary performance within the areas of supplier certification, energy, and community engagement throughout the year 2020.
- Within the energy target area, Coffee House Lane set a target to reduce overall consumption by 10% per tonne of product produced by 2022.
- To date, the company has reduced energy per tonne of product produced by 50% over its 2017 baseline – an exceptional performance.
- This can be attributed to improved energy management on site, enhanced staff training, the installation of LED bulbs and minimising unnecessary usage of the energy intensive coffee roaster.
