Located in the rich fertile Golden Valleys of Munster, Dairygold is Ireland's largest co-operative, supporting thousands of shareholder farmers for more than 150 years.

Our members have a proud history of producing quality-assured, sustainable gold standard dairy ingredients that enrich lives on a global scale.

Our co-operative remains focused on producing cheese and dairy ingredients that can be traced from grass fed cows in Europe's most fertile pastures. We are constantly adding value to our nutritional products through smart innovation, research, industry-leading technology and world-class facilities.

With a clear vision and plan to be a global player in supplying naturally-sourced dairy nutritionals, Dairygold is boldly shaping the future of the industry.

Why Us

Dairygold Food Ingredients are produced from milk sourced exclusively from our own farmers, guaranteeing quality and traceability of supply, and is produced from cows fed on a natural, pasture-based diet. Excellent clean taste profile and low microbiological levels.

100% of milk collected is SDAS certified.
