ORIGINAL CLEEVES
An Assortment of Chocolates, Toffees and Caramels

Its management team has accumulated vast confectionery experience in these and other confectionery businesses. The team has a comprehensive knowledge of the chocolate and sugar confectionery market, not just in Ireland but at an international level.

Our 2000 sq metres factory is located in Newbridge, Co Kildare, a town of over 20,000 people located just over 50km from Dublin and just off the main Dublin - Cork motorway.

Hazelbrook Confectionery has a strong domestic market sales base in Ireland and is next seeking to grow its international sales of both branded and customer labelled / branded products. As a company we tend to focus on manufacturing and product development and generally leave distribution to partner customers.

Why Us

Hazelbrook Confectionery Company produces a wide range of confectionery under both its own brands and brands owned by key customers. Keeping overheads low by concentrating on manufacturing and packing, the company can offer potential new customers competitive pricing on products for both domestic and export markets.

Hazelbrook Confectionery Company provides customers with access to the unique products it makes, including a comprehensive range of confectionery products that cover most market segments and seasons.

Markets

Europe

UK & NI

- The company's focus is to use sustainable ingredients, sustainable packaging materials, and sustainable production processes to get its products to end customers in a sustainable fashion while also making those end customers fully aware of the heritage of both the products and brands and the steps that it takes to preserve and enhance them.
- Within the water and supplier certification target areas, Hazelbrook Confectionery demonstrated an exemplary performance throughout 2020.
- For the water target, the company planned to reduce water usage by 50%

over the lifetime of its current sustainability plan (2020-2024).

- Through the implementation of a range of initiatives, including the fitting of relief valves to hand washing stations, the company has already reduced water usage by 30% over its 2019 baseline, already achieving a target set for 2022.
