Retail

Meitheal Trá na Rinne Teo was established in 1990 in order to prepare, market and sell oysters for its producer members in Dungarvan Bay.

It currently sells product from four oyster farmers who collectively produce between around 500-600 tonnes of top-quality oysters per annum.

We now have a state of the art factory where we grade and prepare the product for sale. This ensures a consistency of quality and grade of oysters and ensures that we can meet our customers requirements.

Why Us

Meitheal Tra na Rinne Teo's idyllic location in a tidal bay on the south coast of Ireland offers unique growing conditions for its oysters.

The North Atlantic Ocean fills and empties into the bay on the Waterford coast twice a day, supplying oysters with fresh clean food, and clearing away any impurities.

All oysters are grown here by local family-run companies who, between them, share almost 100 years of experience.
